Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

1g gamma chain - mouse

C.Species: Mus musculus (house mouse)
C.Species: Mus musculus (house mouse)
C.Species: Nus musculus (house mouse)
C.Species: 19-May-1994 #sequence_revision 10-Nov-1995 #text_change 16-Jul-1999
C.Accession: S38950
B.K.Rebert, S.; Kratzin, H.D.; Zimmermann, B.; Vaesen, M.; Frosch, M.; Weisgerber, C.;
Biol. Chem. Hoppe-Seyler 34', 993-1000, 1993
A.Title: Primary structure of the murine monoclonal IggZa antibody mAb735 against alp A;Reference number: S38950; MUID:94128242; PMID:8297501
A.Reference number: S38950
A.Status: preliminary
A.Molecule type: protein
A.Residues: 1-246 < KLE
C.Superfamily: immunoglobulin C region; immunoglobulin homology
C;Reywords: immunoglobulin homology < IMM>
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Riklebert, S.; Kratzin, H.D.; Zimmermann, B.; Vaesen, M.; Frosch, M.; Weisgerber, C.; submitted to the EMBL Data Library, January 1993
A;Description: Primary structure of the murine monoclonal IgGza antibody mAb735 again: A;Reference number: S40295
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 1;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   ij
